

Are you 65 or older?

Have you checked your benefit plan recently?

If you are 65 or older, there may be changes to your benefit coverage.

OASSIS advises you check the details of your benefit coverage outlined in your benefit booklets so you're aware of how turning 65 or older may impact your coverage.

It's common for reductions or loss of coverage to occur once you turn 65. This may include:

- Reduction of your Basic Life and AD&D volumes
- Termination of your Short-Term Disability and Long-Term Disability benefits
- Loss of optional benefits like Critical Illness and Dependent Life

Contact your employer's HR department, or reach out to OASSIS directly, for more information on how to access your benefits booklet.
